Operating System Labs

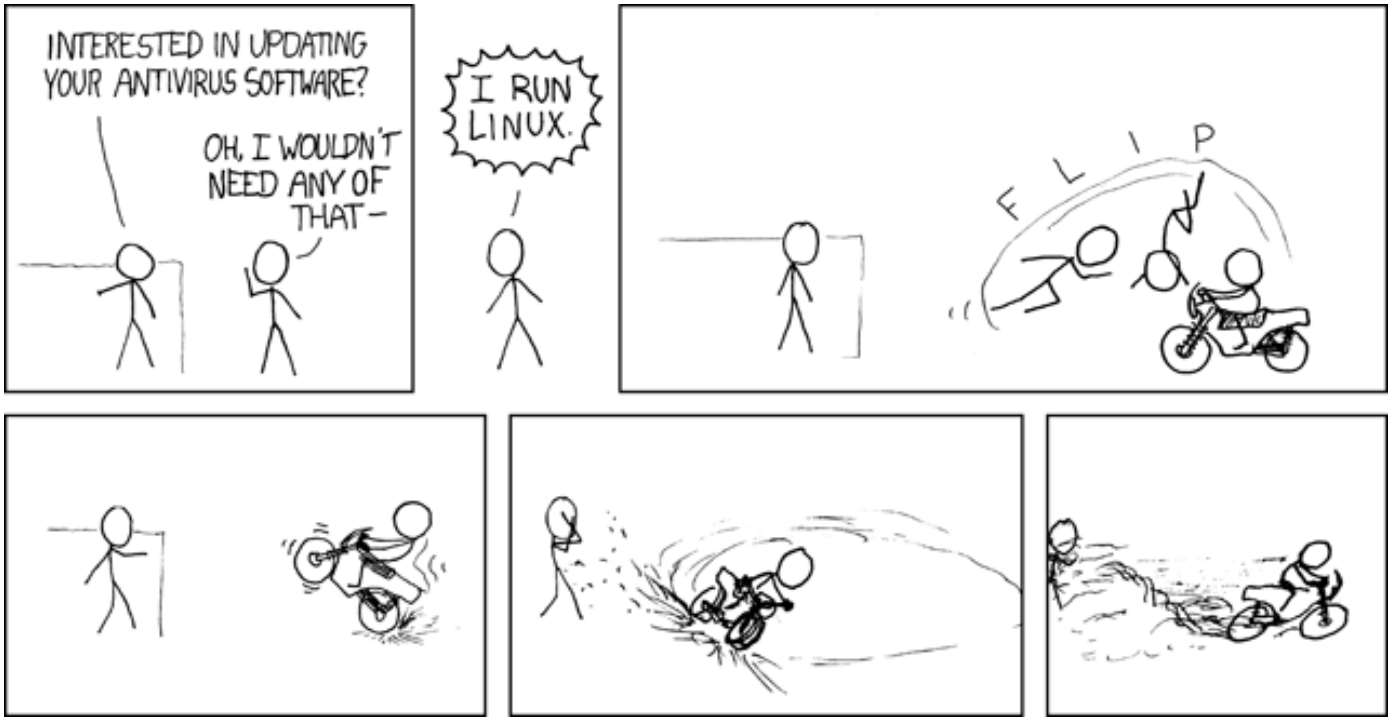
- Introduction to Unix (*nix)
- Course Overview

Operating System Labs

- Introduction to Unix (*nix)
- Course Overview

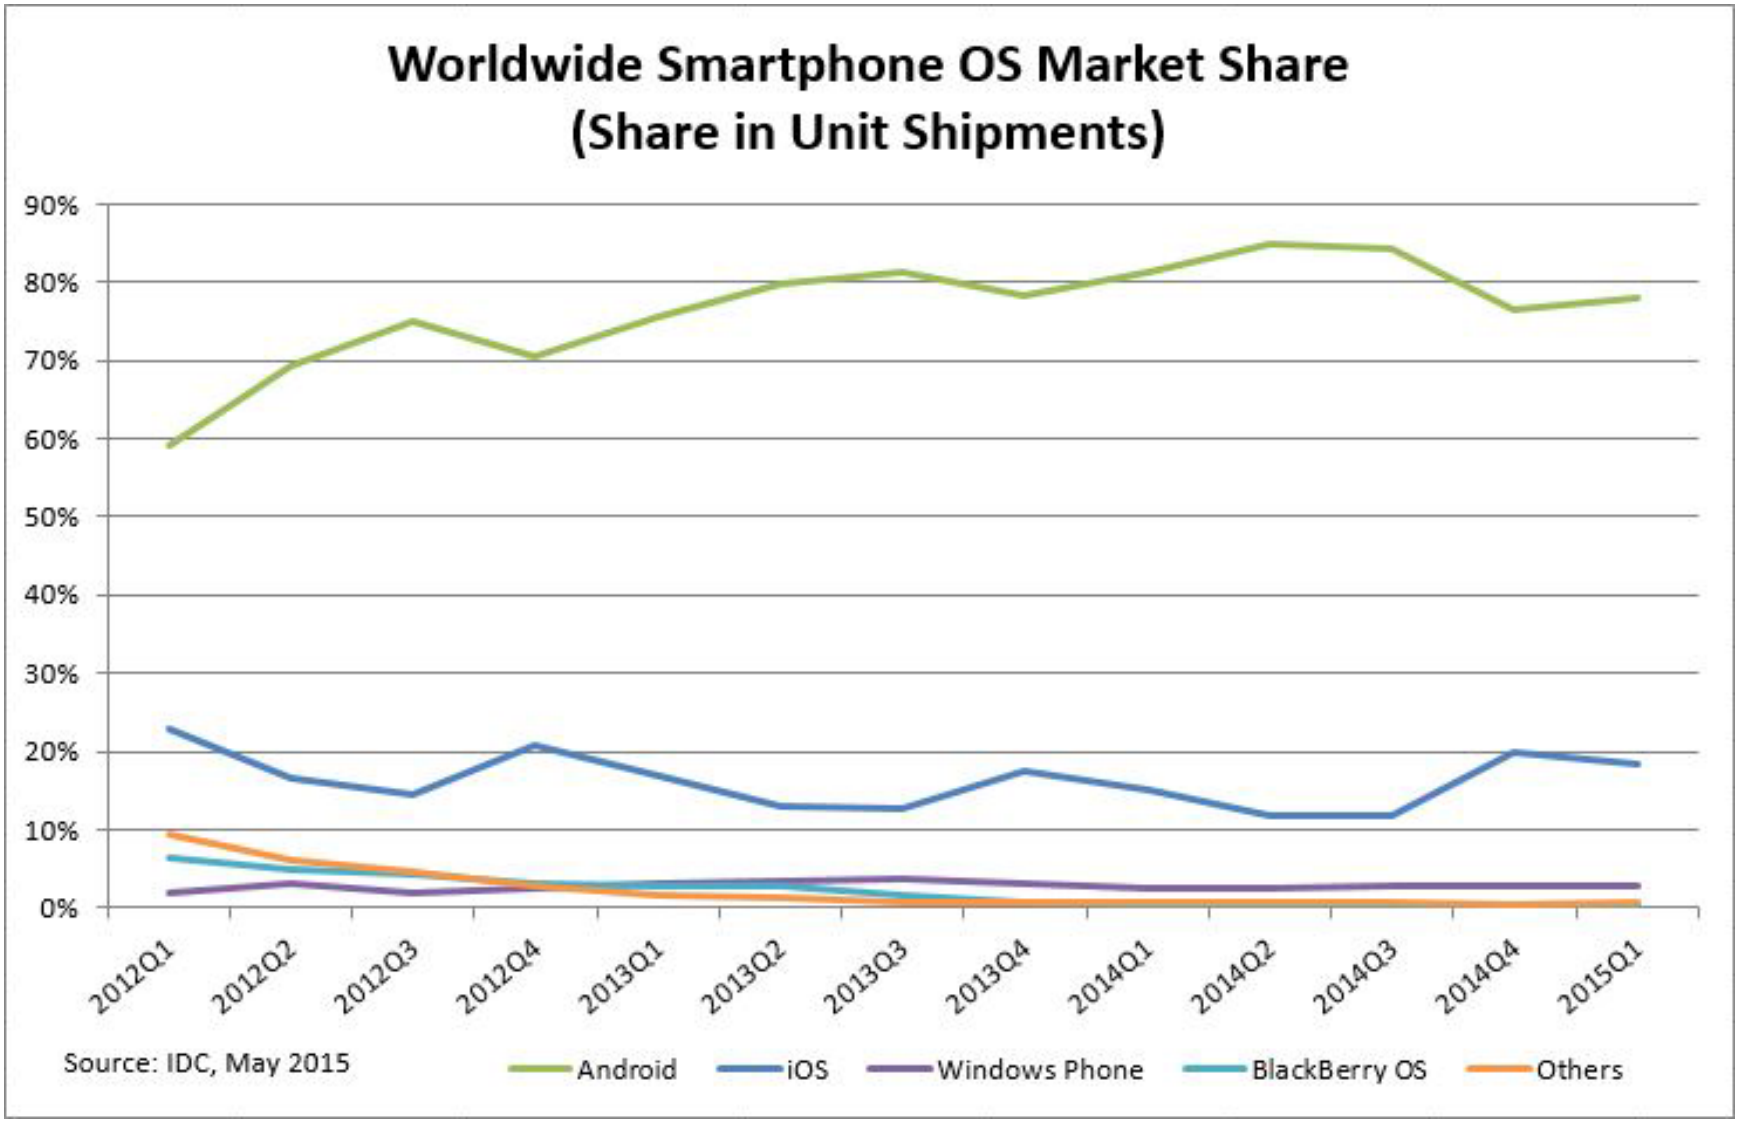
Unix / *nix

- What
  - A family of operating systems
  - Wildly used
  - A cool thing



Unix / *nix

- Smartphone



Unix / *nix

- Web Server

Source	Date	Unix, Unix-like				Microsoft Windows	References
		All	Linux	BSD	Unknown		
W3Techs	Feb 2015	67.8%	35.9%	0.95%	30.9%	32.3%	[54][55]
Security Space	Feb 2014	<79.3%	N/A			>20.7%	[56][57]
W3Cook	May 2015	98.3%	96.6%	1.7%	0%	1.7%	[58]

Unix / *nix

Category	Source	Date	Linux	BSD and other Unix	Windows	In-house	Other
Desktop, laptop, netbook	Net Applications[68]	Dec 2014	1.34% (Ubuntu, etc.)	7.21% (OS X)	91.45% (7, 8, XP, Vista)		
Smartphone, tablet, handheld game console, smart TV, Wearable computer	StatCounter Global Stats[69]	Dec 2014	53.86% (Android)	31.10% (iOS)	1.87% (WP8, RT)		13.17%
Server (web)	W3Techs[70]	Sep 2014	36.72% (Debian, Ubuntu, CentOS, RHEL, Gentoo)	30.18% (FreeBSD, HP-UX, Solaris, OS X Server)	33.10% (W2K3, W2K8, W2K12)		
Supercomputer	TOP500[67]	Nov 2014	97.0% (Custom)	2.4% (AIX)	0.2%		0.2%
Mainframe	Gartner[64]	Dec 2008	28% (SLES, RHEL)	72% (z/OS) UNIX System Services			
Gaming console	Nintendo, Sony, Microsoft, Valve Corporation	Jun 2013	0% (SteamOS)	29.6% (PS3)	29.5% (Xbox 360)	40.9% (Wii)	
Embedded	UBM Electronics[71]	Mar 2012	29.44% (Android, Other)	4.29% (QNX)	11.65% (WCE 7)	13.5%	41.1%
Real time	NewTechPress[72]	Nov 2011	19.3% (Android)		35.8% (XPE, WCE)	20.1%	24.8%

Worldwide Device Shipments by Operating System

Source	Year	Android	iOS/OS X	Windows	Others
Gartner[2]	2014	48.61%	11.04%	14.0%	26.34%
Gartner[3]	2013	38.51%	10.12%	13.98%	37.41%
Gartner[4]	2012	22.8%	9.6%	15.62%	51.98%

Unix / *nix

- As your daily OS (work with it)
  - Coding
  - Web
  - Text processing (slides, documents)
  - Multimedia
  - The Shell
    - a working space
  - “Free”

Unix / *nix

AN UPDATE IS AVAILABLE FOR YOUR COMPUTER
COOL, MORE FREE STUFF!
NOT AGAIN!
OOH, ONLY $99!
linux
windows
mac
stickycomics.com

Unix / *nix

- As an example for studying OS
  - Open source
  - High quality documents are freely available
  - Great community

Unix / *nix

- History
  - Multics: mid-1960, MIT+GE+Bell Labs
    - Segmentation, Dynamic linking
    - Complexity
  - Unics: 1969, Ken Thompson
    - Using PDP-7 assemble language
  - C programming language, 1972, Dennis Ritchie
    - Rewrite unix for PDP-11

Unix / *nix

THE

C

PROGRAMMING

LANGUAGE

Unix

- History
  - GNU Project, 1983, Richard Stallman
    - GNU: GNU is Not Unix
    - Unix-like
    - Free software, contain no Unix code
    - GNU software
      - gcc (GNU C compiler)
      - gdb (GNU debugger)
      - Emacs
    - Free Software Foundation
    - Free Software License
      - GNU General Public License (GPL)

Unix

- Unix standardization
  - ISO C
    - Standard for the C programming language
  - POSIX
    - IEEE Portable Operating System Interface
  - SUS
    - Single Unix Specification

Unix

- Unix implementations
  - Unix v6, v7 (Bell lab)
  - FreeBSD (U.C. Berkeley)
  - Sun OS/Solaris (Sun)
  - System V (AT&T)
  - OS X (Apple)
  - Linux, 1991, Linus Torvalds
    - A (free) kernel with support of GNU packages
    - distributions
      - Ubuntu, Debian, CentOS, Federa, Gentoo, ArchLinux
      - Android

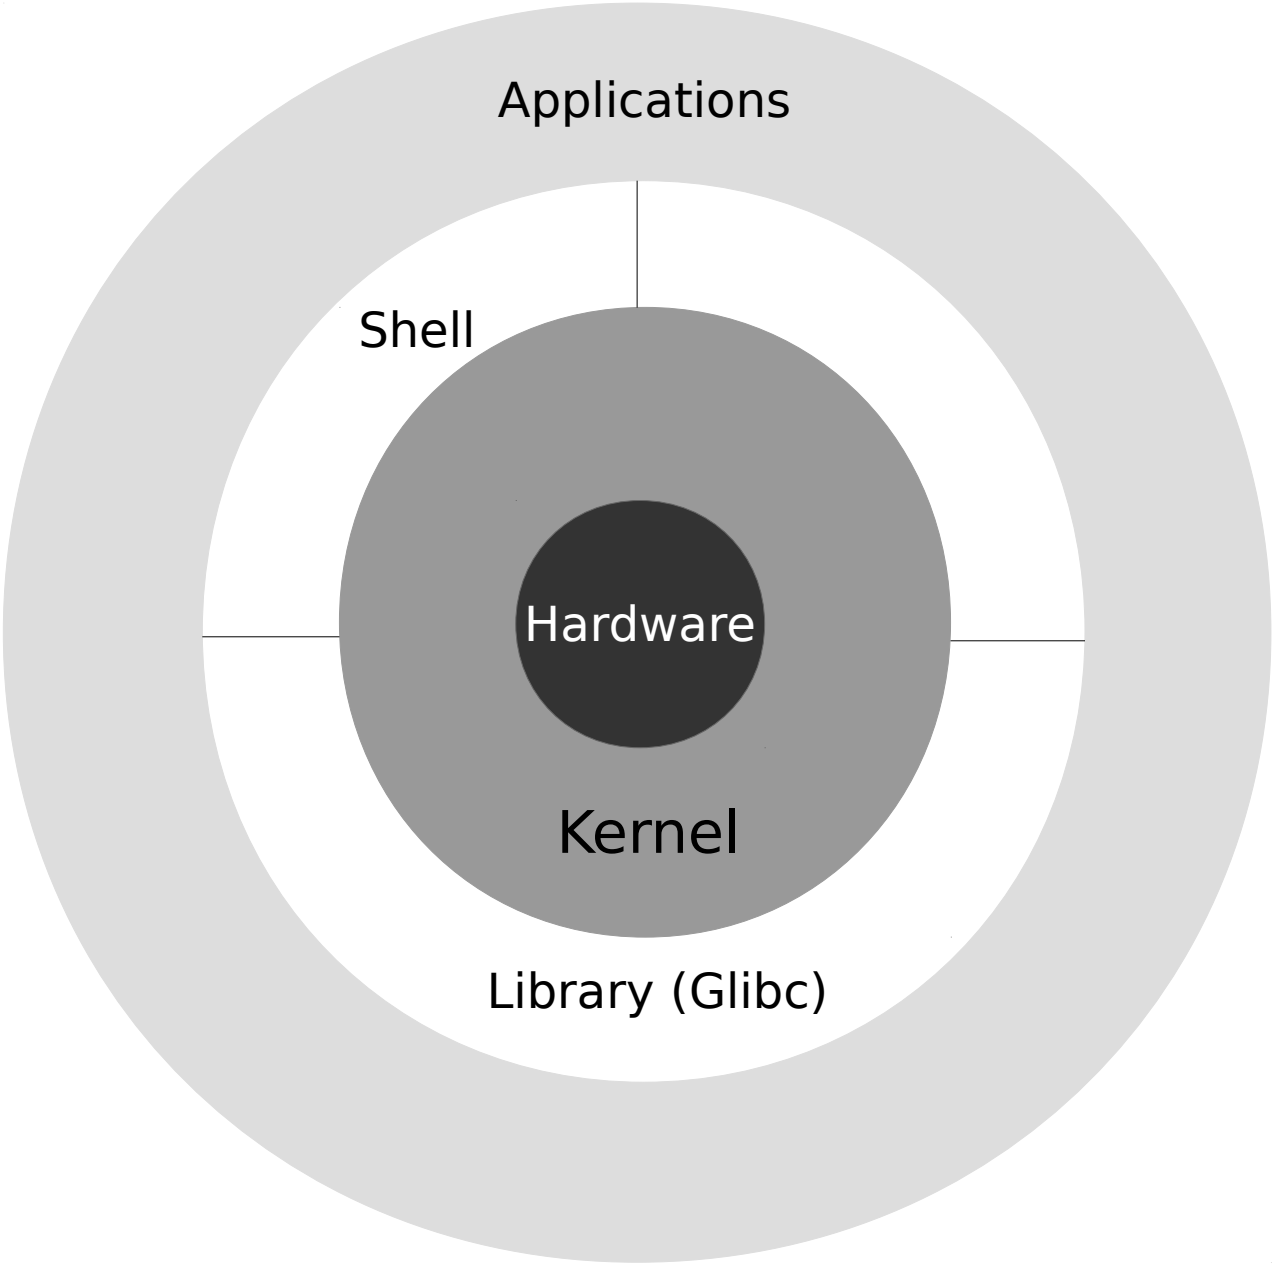
Unnamed PDP-7 operating system
Unix Version 1 to 4
Unix Version 5 to 6
Unix Version 7
PWB/Unix
BSD 1.0 to 2.0
Unix/32V
BSD 3.0 to 4.1
Xenix 1.0 to 2.3
Xenix 3.0
System III
BSD 4.2
Sun OS 1 to 1.1
SCO Xenix
System V R1 to R2
Unix Version 8
SCO Xenix V/286
AIX 1.0
System V R3
BSD 4.3
Sun OS 1.2 to 3.0
SCO Xenix V/386
HP-UX 1.0 to 1.2
Unix 9 and 10 (last versions from Bell Labs)
HP-UX 2.0 to 3.0
BSD 4.3 Tahoe
System V R4
BSD 4.3 Reno
Sun OS 4
BSD NET/2
Linux 0.0.1
Minix 1.x
NEXTSTEP/ OPENSTEP 1.0 to 4.0
386BSD
HP-UX 6 to 11
NetBSD 0.8 to 1.0
SCO Unix 3.2.4
UnixWare 1.x to 2.x
Linux 0.95 to 1.2.x
FreeBSD 1.0 to 2.2.x
BSD 4.4 to 4.4 lite2
OpenBSD 1.0 to 2.2
NetBSD 1.1 to 1.2
OpenServer 5.0 to 5.04
Solaris 2.1 to 9
AIX 3.x to 7.1
NetBSD 1.3
FreeBSD 3.0 to 3.2
OpenServer 5.0.5 to 5.0.7
UnixWare 7.x
Minix 2.x
Linux 2.0 to 2.6.x
Mac OS X Server
OpenServer 6.0
Solaris 10
OpenSolaris and derivatives
Minix 3.x
Mac OS X 10.0 to 10.9.x (Darwin)
FreeBSD 3.3 to 9.x
NetBSD 1.3 to 6.x
OpenBSD 2.3 to 5.x
HP-UX 11i to 11i v3
Linux 3.x
Solaris 11

Unix Operating System



Unix Operating System

- Login
  - User name
  - Password

- File and Directory
  - Hierarchical structure
    - /home/ybwu/Documents/myfile
  - Root directory: “/”

Unix Operating System

- Input and Output
  - File operations
  - Example: File descriptor
    - unsigned int
    - Allocate when open a file
    - Revoke when close a file
    - read() / write()

```
int fd = open(“foo”, “r”);
read(fd, buffer, size);
close(fd);
```

Unix Operating System

- Input and Output
  - Standard input, output, error
    - 3 file descriptors
    - Automatic allocated for every process

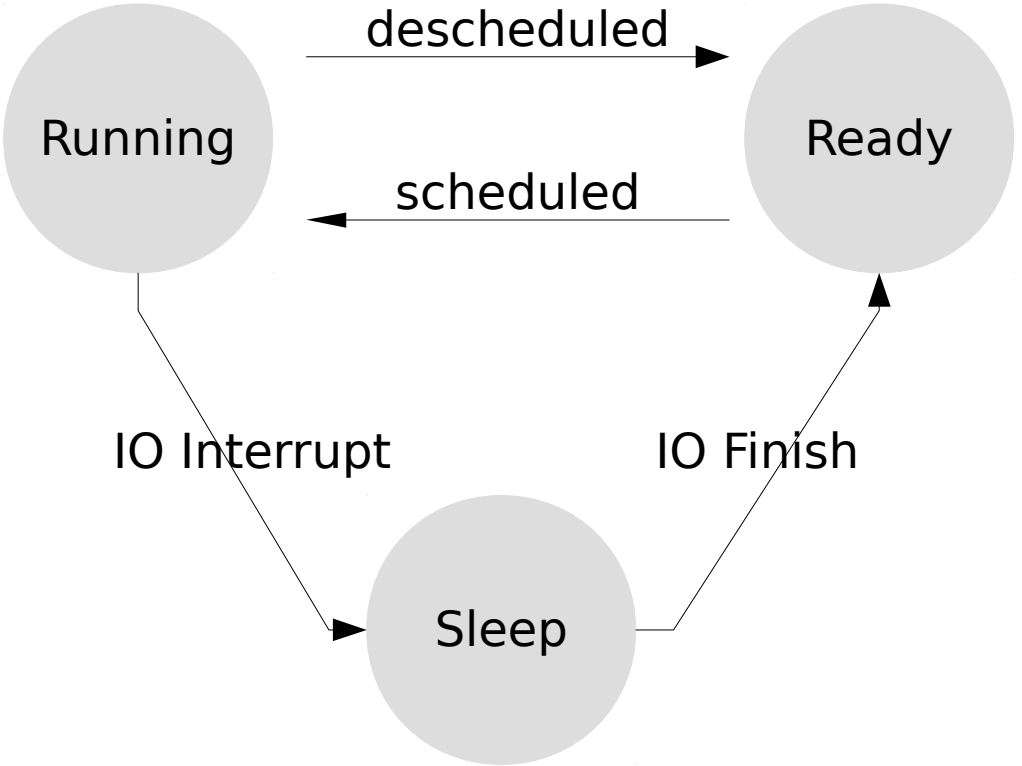
```
read(STDIN_FILENO, buffer, size);
write(STDOUT_FILENO, buffer, size);
write(STDERR_FILENO, buffer, size);
```

Unix Operating System

- “Everything is a file”
  - Documents
  - Directories
  - Hard-drives
  - Keyboards
  - Printers
  - /proc
- The same API: open, read, write, close

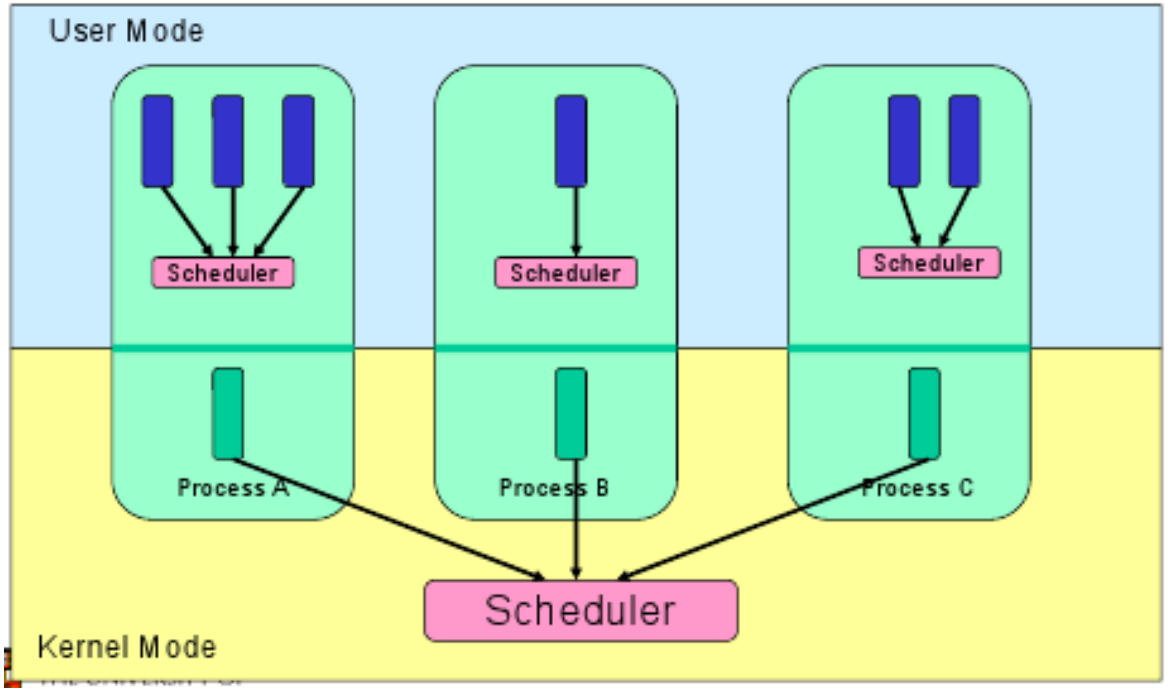
Unix Operating System

- Process
  - Process ID (PID)
  - Process status: ready, run, sleep



Unix Operating System

- Thread
  - Processes that share same address spaces, file descriptors, ...
  - Kernel thread / User thread



Unix Operating System

- Handle Errors
  - Not only report error, also provide detail info.
  - Variable: errno
  - Function: void perror(char* msg);
    - Print msg
    - Print error message string corresponding to the current errno

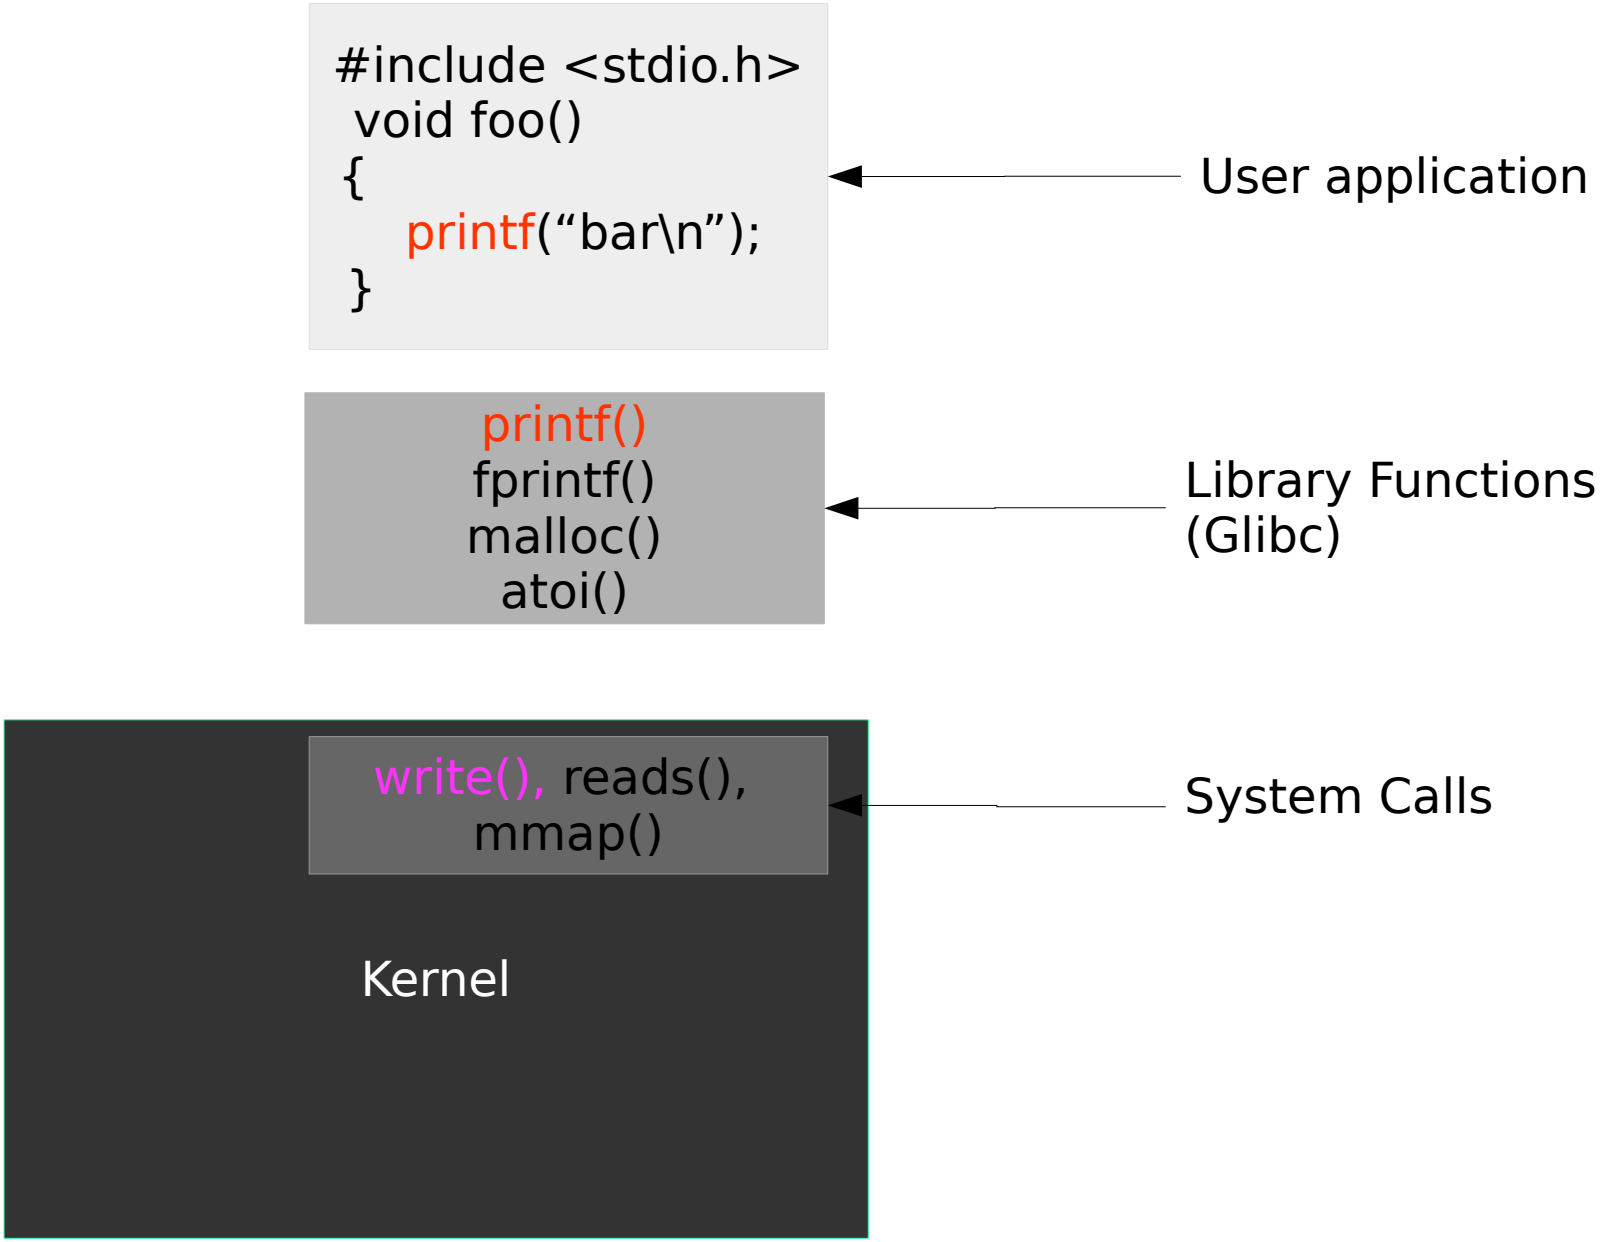
Unix Operating System

- Signal
  - Tell a process that something has happened
  - Example
    - pressing Ctrl+C generate a signal to terminate current process

Unix Operating System

- System Call and Library Function
  - System Call:
    - Provided by kernel
    - Doing restricted operations with hardwares
    - User mode, kernel mode
  - Library Function
    - Provided by user mode software developer
    - Some functions reused many times

Unix Operating System



Unix Operating System

- Summary
  - Basic terms
    - File descriptor, stdin, stdout, stderr
    - Pid
    - errno, perror(),
    - Signal: Ctrl + C
  - System Call
  - Library Functions

Operating System Labs

- Introduction to *nix
- Course Overview

Course Overview

- Objectives
  - To get some practical knowledge on OS
  - To discover the fun of programming
- How
  - Reading
  - Coding
  - Presentation

Course Overview

- In this semester:
  - 6 projects
  - 3 of them need oral presentations
  - Course website:

    http://ybwu.org/ecnu-oslabs/index.html

Course Overview

- Project 0
  - To get familiar with Linux
  - Shell command
    - cd, ls, mkdir, rm, ...
  - Dev environment
    - gcc, gdb

Course Overview

- Project 1
  - Sorting
  - Warm up with linux programming
  - I/O system call

Course Overview

- Project 2
  - Implement your own shell
    - Linux process API
    - Redirect
    - Pipe

Course Overview

- Project 3
  - Implement your own malloc() / free()
    - Dynamic memory allocation
    - The pointer of C

Course Overview

- Project 4
  - Implement your own lock
    - Introduction to concurrency
    - Linux pthread API
    - Thread safe data structures

Course Overview

- Project 5
  - Implement a file defragmentor
    - Reorganize file blocks
    - Familiar with basic concepts of file system

Course Overview

- Projects
  - P0, P1, P2 should be completed individually
  - P3, P4, P5 should be completed in groups of three.
- Grading
  - The quality of your projects
  - Presentation
- General advice
  - Start early
  - Build your projects incrementally

Course Overview

- How
  - Reading
  - Coding
  - Presentation

Course Overview

- Reading
  - The main book:
    - *Operating Systems: Three Easy Pieces,* by Remzi H. Arpaci-Dusseau and Andrea C. Arpaci-Dusseau
    - http://pages.cs.wisc.edu/~remzi/OSTEP/

Course Overview

- Reading
  - Reference for Unix programming:
    - *Advanced Programming in the UNIX Environment,* by W. Richard Stevens, Stephen A. Rago
  - Reference for C programming:
    - *The C Programming Language*, by Brian W Kernighan, Dennis M. Ritchie
  - Reference for Linux kernel:
    - *Linux Kernel Development*, by Robert Love

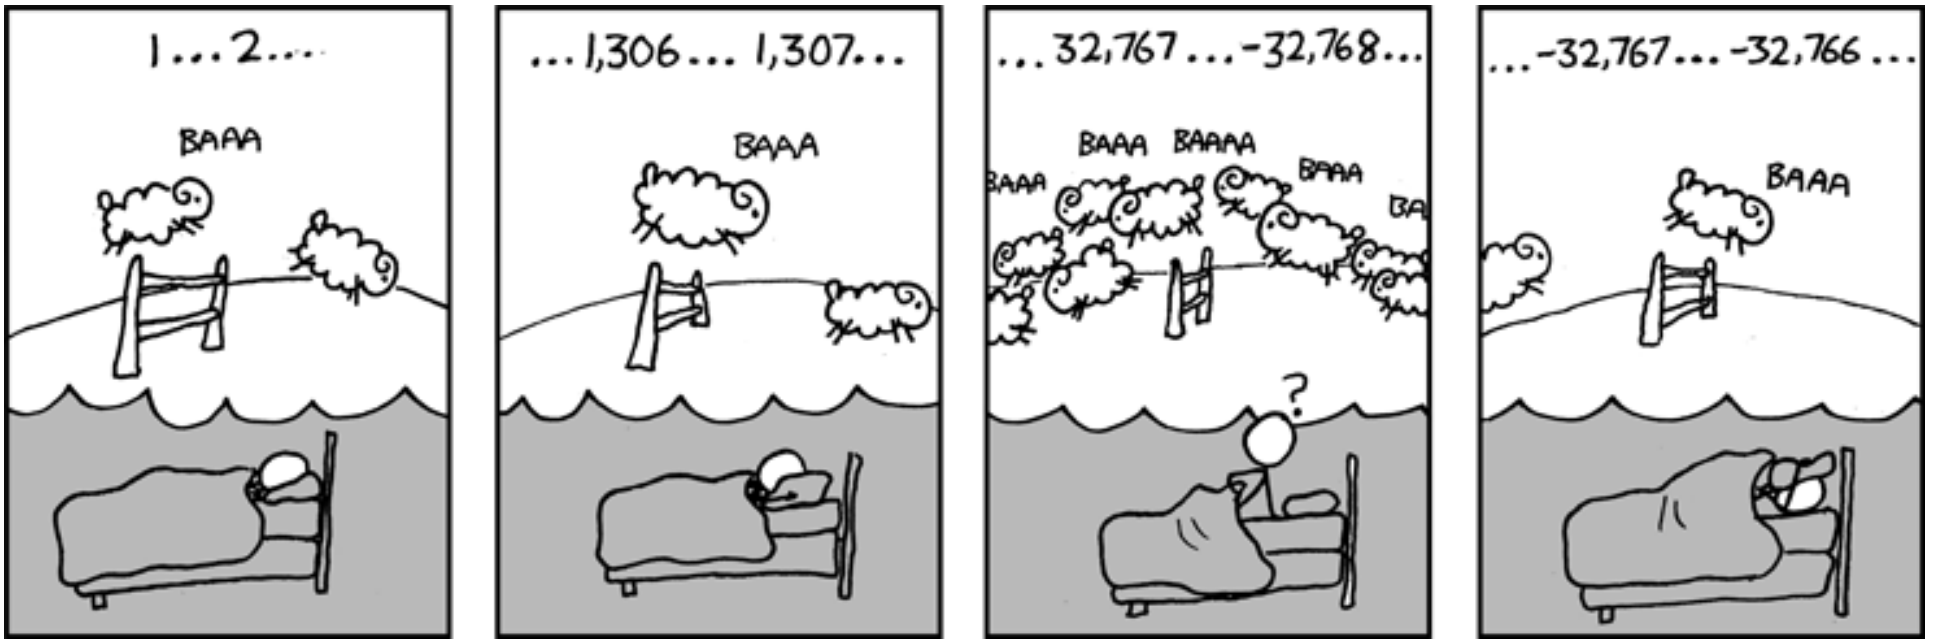
Course Overview

- Reading
  - RTFM
  - “Read The Manual”

Course Overview

- Coding
  - Coding without IDE
  - Using C, no C++, no Java ...
  - Compile with gcc
  - Debug with gdb
- Make your code
  - Well structured
  - Clean
  - Easy to read

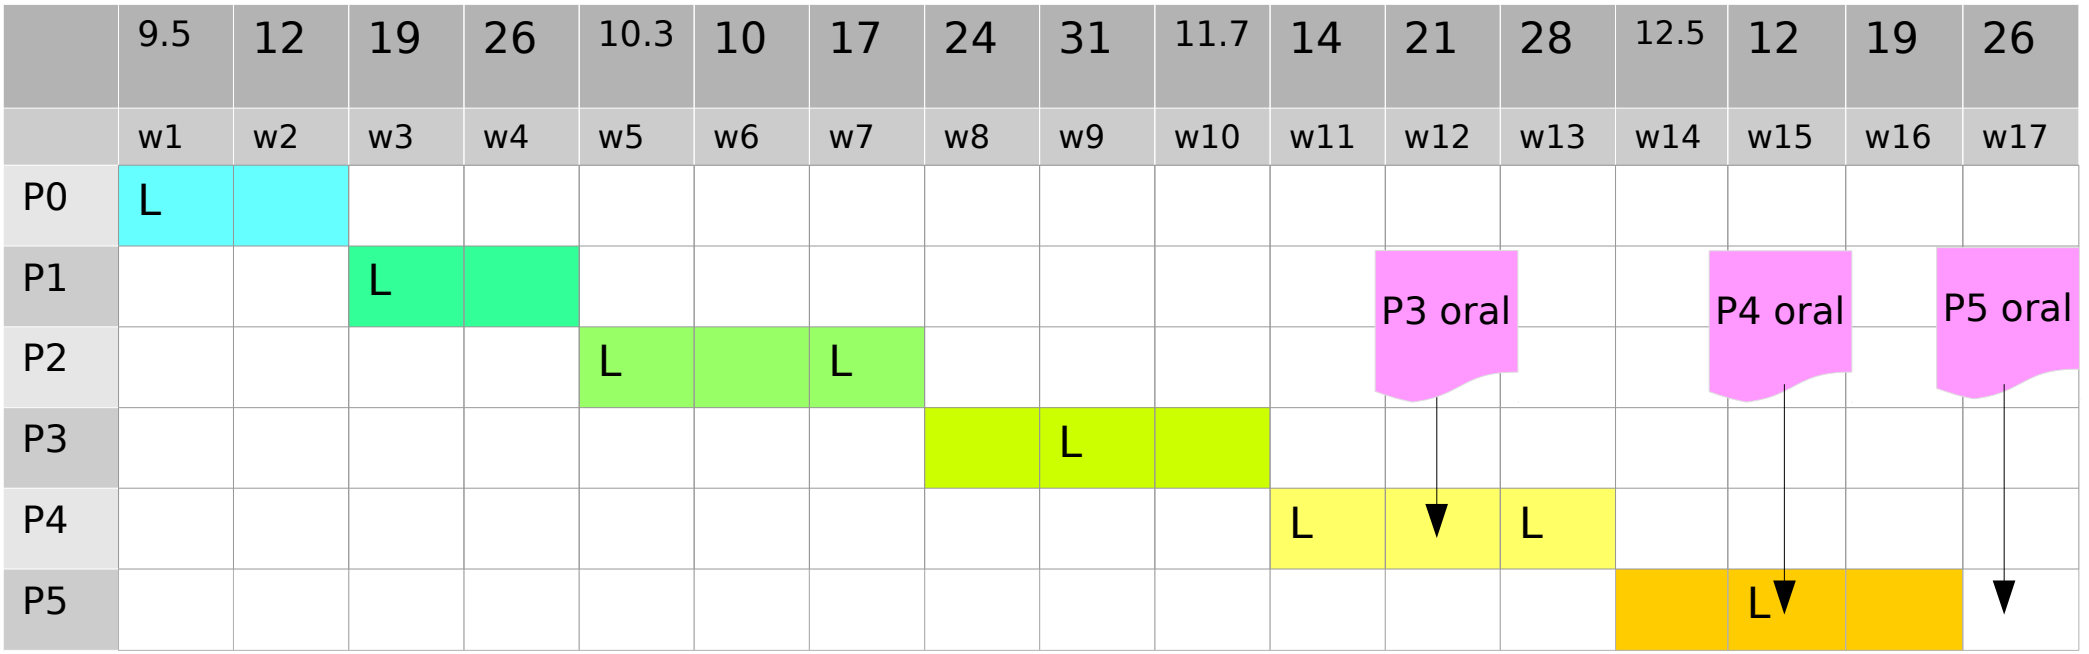
Course Overview



Course Overview

- Presentation
  - you will present one of your projects
  - About
    - What have you done
    - How to accomplish them
    - Your favorite parts
    - What did you learn
    - ...

Operating System Labs



Course Overview

- Policies
  - Plagiarism policy
  - Late policy

Course Overview

- Plagiarism policy
  - What is OK
    - Discuss programming specifications
      - What is the meaning of “redirection”
    - Discuss reading materials
      - What are the differences between exec functions?
    - Discuss implementation strategies
      - How to make the lock faster?

Course Overview

- Plagiarism policy
  - What is NOT OK
    - Copy codes/docs from someone
    - Beg someone to write a copy for you

Course Overview

- If we discover any improper code sharing
  - ALL participants will loss **ALL** credits of the project
- No Cheating!

Course Overview

- Late policy
  - For P0, P1, P2
    - Late handins are NOT accepted.
  - For P3, P4, P5
    - Your group will have 3 “late days”.
    - You need to email TA at least 1 hour before the dateline.
    - If all your 3 “late days” are used, late handins will not be accepted.
- Start Early!

Course Overview

- Contact
  - Instructor:
    - Yuanbin Wu, ybwu@cs.ecnu.edu.cn
    - 911 Science Building B
  - TA:
    - Hanwei Zhang, zhanghanwei0912@gmail.com
    - Qiuyang Liu, 51151201040@ecnu.cn
- Office hour
  - TBD

Course Overview

- Project 0 due
  - 21:00 Sep. 18th
